EXPERIENCE

Backend Engineer, Northwind Analytics (Jul 2022 - Present)

Design and maintain REST APIs using Python and FastAPI serving 200k+ daily requests. Migrated legacy endpoints to FastAPI, cutting median latency by 40%. Own PostgreSQL schema design for the billing and analytics services. Deployed services on AWS (ECS, RDS) with Docker containers and a GitHub Actions CI/CD pipeline.

Software Engineer, Fintrack Systems (Jun 2020 - Jun 2022)

Built internal REST APIs in Python and Flask for transaction reconciliation. Wrote unit and integration tests with pytest, maintaining over 85% coverage. Worked directly with PostgreSQL for reporting queries.

EDUCATION

B.S. in Computer Science, University of Washington, 2020

SKILLS

Python, FastAPI, Flask, PostgreSQL, AWS, Docker, GitHub Actions, REST APIs, Git, pytest
